

XENOSIS IT SOLUTIONS

Engineering Excellence, Every Solution, Every Time

2-Months Internship Assignments

1st Month: Basic-Intermediate Level
(August 10 – September 10)

Domain: Web Developer Intern

Deadline: End of the week.

Week 1: Basic Assignment

Assignment 1: Portfolio Website

- **Objective:** Create a personal portfolio website showcasing your skills, projects, and contact information.
- **Skills Covered:** HTML, CSS, and basic JavaScript.
- **Outcome:** By the end of this week, you should have a fully functional, mobile-friendly portfolio site that introduces you and your work.

Basic Requirements:

1. Use HTML, CSS, and basic JavaScript.
2. Implement responsive design using CSS Grid/Flexbox.
3. Include a home page, about page, and contact form.

Deadline: End of Week

Week 2: Intermediate Assignment

Assignment 2: Dynamic Blog Platform

- **Objective:** Build a blog platform where users can create, edit, and delete blog posts.
- **Focus:** You should have a functional blog site where users can manage their posts.
- **Skills Covered:** HTML, CSS, JS, SQLite, CRUD operation

Basic Requirements:

1. Use HTML, CSS, and JavaScript for the frontend.
2. Implement basic CRUD operations (Create, Read, Update, Delete) using a backend framework like Node.js or Django.
3. Store data in a simple JSON file or a local database (e.g., SQLite).

Deadline: End of Week

Week 3: Intermediate Assignment

Assignment 3: E-Commerce Product Page.

- **Objective:** Develop a product page for an e-commerce site that includes product details, images, and an add-to-cart feature.
- **Focus:** A dynamic product page with basic e-commerce functionality.
- **Skills Covered:** HTML, CSS, and JavaScript.

Basic Requirements:

1. Use HTML, CSS, and JavaScript.
2. Implement a product gallery with zoom-in functionality.
3. Add an interactive add-to-cart button with a simple cart system.
4. Ensure the design is fully responsive.

Deadline: End of Week

Week 4: Advanced Assignment

Assignment 4: Build a RESTful API for a Task Management App

- **Objective:** Develop a RESTful API that supports a task management app where users can create, update, delete, and list their tasks.
- **Focus:** RESTful API ready to support a frontend task management application.
- **Skills Covered:** API Integration

Basic Requirements:

- Use Node.js/Express or Django for the backend.
- Implement authentication (optional).
- Store tasks in a database (e.g., MongoDB, MySQL).
- Ensure the API follows REST principles and is well-documented.

Outcome: By the end of the week, you should have a functional RESTful API ready to support a frontend task management application.

Mid-Internship Review: A session to discuss the completed assignments.

Assignment Submission: Assignment submission will be taken at end Mid of internship

General Guidelines

Self-Directed Learning: Participants are expected to be proactive in learning and completing their tasks. While guidance is available, no daily sessions will be conducted.

Resource Access: Participants will have access to relevant learning materials and tools but must take the initiative to explore and utilize them.

Evaluation: Performance will be assessed based on assignment completion, project contributions, and presentation effectiveness.

Thank You!

We look forward to
seeing what you can
achieve!
